Red Cross Appeal.

The Alberta Division of the Red Cross Society of Canada asks the citizens of Alberta to co-operate with them in the coming appeal for funds to carry on their contribution to a world-wide organization for "The Improvement of Health, the Prevention of Disease, and the Mitigation of Suffering Throughout the World." Many people in the cities and also through the province are still under the apprehension that the Red Cross Society is a war time necessity only and ask "What is the Red Cross doing?" In answer to this question we submit to you some of the services the Canadian Red Cross Society is striving to fulfil.

The Society introduces Junior Red Cross in the schools. Under Junior Red Cross organized in 1920 there are already 9,000,000 children throughout the world banded together to practice healthy living, to befriend other less fortunate children and so to gain actual experience in good citizenship. Over 20,000 children in Alberta are organized under Junior Red Cross in our schools.

The Canadian Red Cross also organizes Classes in Home Nursing where women and girls are taught the elements of nursing and principles of home hygiene that the family may "keep well."

The Society operates Seaport Nurseries at the Atlantic ports. In them immigrant mothers and children are welcomed to Canada and are given such attention as may be needed.

The Red Cross is equipped to render Disaster Relief when a community is overwhelmed by catastrophe.

As auxiliary to the Government as set forth in the Act of Incorporation, the Canadian Red Cross Society provides help and comfort to the disabled ex-service man, and, if necessary in case of sickness, relieves the needs of his family.

Red Cross Nursing Outposts are established in outlying districts to provide a nursing and hospital service to settlers who, living in pioneer communities, would otherwise be without medical care.

The Red Cross publishes and distributes Health Literature so that people may come to realize the amount of unnecessary sickness which exists among them and may learn how it can be prevented.

All these services are necessary to the welfare of Canada. In order that they may be maintained, improved and extended your help and money are needed.

In becoming a member of the Red Cross Society you affiliate yourself with the greatest organization in the world with the highest ideals and aims in The Improvement of Health, Prevention of Disease, and the Mitigation of Suffering, Peace on Earth, Goodwill Towards Men.

Rugby.

On Friday afternoon, Miss Brubaker, the teacher, and the pupils of Rugby school, entertained the ladies of the district, at a Halloween party. A very merry party it proved to be too. In place of the usual, orderly rows of scholars, bending studiously over their desks, we found the ten little niggers and all their companions. Witches with their broomsticks, black cats and owls were there in plenty, and in one corner a real live witch was busy telling fortunes, and dispensing various wonderful recipes and cures from her cauldron.

The programme which consisted of darky songs, recitations, etc., was thoroughly enjoyed by all. When games were over, a lunch of pie, sandwiches, and a witch's cake were served, then after singing the national anthem we wended our way homewards, and we would not mind a bit if All-Hallow-E'en came more than once a year.

High-grade Gasoline.

We have installed this week a new pump for our high-grade Gasoline, — a consignment of which has just arrived.

If your lamp or burner, or any gasoline appliance, becomes carbonized, try this gasoline of ours and note the effect.

It is free from sulphur and is the best product to be bought to-day.

A BROKEN DOWN SYSTEM. This is a condition for the sake to which doctors give many names, but which few of them really understand. It is simply weakness, a breakdown, as it were, of the vital forces that sustain the system. No matter what may be its causes (they are almost numberless), its symptoms are much the same: the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what a boon is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off these morbid feelings, and as night succeeds the day this may be more certainly secured by a course of **THE NEW FRENCH REMEDY, THERAPION No. 3** than by any other known combination. So sure is its action in accordance with the directions accompanying it, that the shattered health is restored **THE EXPIRING LAMP OF LIFE LIGHTED UP AFRESH**, and a new existence imparted in place of what had been a life of suffering, and, in many cases, of despair. This wonderful medicine is suitable for all ages, constitutions and conditions, in either sex, and it is difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this recuperative remedy, which is destined to cast into oblivion everything that had preceded it for this wide spread & numerous class of human ailments. Sold by leading chemists or direct from the manufacturer, **Dr. J. C. LACROIX, 20, Boulevard de la Madeleine, Paris, France.**

SUNDAY SCHOOL LESSON

NOVEMBER 7

THE FALL OF JERICHO

Golden Text: This is the victory that hath overcome the world, even our faith. 1 John 5:4.

Lesson: Joshua, 6:12-20.

Devotional Reading: Psalm, 66:1-9.

Explanations and Comments

1. Directions for the Capture of Jericho verses 1-7.—"Now Jericho was straitly shut up because of the children of Israel; none went out and none came in." The Israelites had crossed the Jordan bearing at the head of the marching hosts the ark, the symbol of their religion, and their coming had struck terror into the hearts of the people of Jericho. The latter received strange directions as to the silent compassing of the city. "Ye must not shout," Joshua commanded the people, "nor let your voice be heard, neither shall any word proceed out of your mouth, until the day I bid you shout, then shall ye shout."

The hardship was not in marching around the city, but in the doing it day after day without result. Yet the consecutive days of marching were the preparation for the seventh day with its shouts of victory. To many people their lives day after day seem but a treadmill existence. Thirty-two per cent of all the suicides are said to take place on Monday. May we not infer this to be because the discouraged beings cannot face another week like all those that have preceded it? Yet the monotonous weeks are a preparation, a discipline, for "the good success" that must be theirs who persevere in the life wherein God has placed them.

2 Years' Backache
Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloane, from Georgetown. "While in Smith Bros' Drug Store, I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two years' backache was rubbed away, and to-day I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nerviline—the liniment that never fails. 35c at all dealers.

The more money a man has the more he is abused and the less he cares.

Conquer Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic inhaling of smoke or fumes from the remedy prevents recurrences and often effects a permanent cure.

Little Helps For This Week

Love is the fulfilling of the law Rom. VIII, 10.

And see how everywhere Love comforts, strengthens, helps, and saves us all!

What opportunities of good befall To make life sweet and fair.

—Celia Thaxter.

Oh! let us not wait to be just a pitiful or demonstrative toward those we love until they or we are struck down by illness, or threatened with death. Life is short, and we have never too much time for gladdening the hearts of those who are travelling the dark journey with us. Oh! be swift to love, make haste to be kind.

—Henri Frederic Amiel.

Contractor Found Way To Health

After Suffering Tortures From Indigestion and Run-Down Condition, He Quickly Regains Health And Strength. Takes Tanlac.

Edison Bradshaw, a successful Toronto contractor, 413 Wellesley Street, says: "I hope my story will be the means of helping others who suffered as I did. I feel like a new man, thanks to Tanlac."

"Before taking Tanlac, I doctored for nervous prostration but seemed to be getting worse. I had no appetite and when I forced myself to eat the pains from indigestion were torture. My heart bothered me after the slightest exertion. I was nervous and irritable and could scarcely sleep. At times I would doze off, then suddenly my muscles would twitch and I would awake with a start. I was almost in despair."

"Nothing seemed to help me, until I started to take Tanlac. The first two bottles made me feel so much better that I kept on taking it. Now my appetite is very good, stomach normal, nerves in good shape. I can sleep well at night, in fact have entirely recovered."

"I heartily recommend Tanlac because I feel sure it will do for others what it has done for me in restoring my health."

Tanlac has helped thousands of men and women. It is nature's own remedy made from roots and herbs according to the famous Tanlac formula. The first bottle, as a rule, brings wonderful relief. Keep up the treatment and see how quickly you will grow stronger and healthier.

Don't neglect your health, don't suffer needlessly but begin taking this marvellous tonic now. Ask your druggist for Tanlac today.

Old Country Travellers
Get Special Service

Canadian Pacific To Provide Through Service To Seaboard

In order to give Old Country Christmas travellers a fast through service to the Atlantic seaboard, the Canadian Pacific will operate from Edmonton, Calgary, Saskatoon, Moose Jaw, Regina, Brandon, Winnipeg and other western points, special tourist sleeping cars to connect with December sailings from West Saint John, N.B. Special trains will also be operated from Winnipeg 10.00 a.m. December 4th, 6th, and 12th. This service will permit passengers to travel from Western Canada to the Old Country with but the one change—at the ship's side.

Special round trip excursion tickets will be on sale to the seaboard (Saint John, Halifax, Portland) December 1, 1926 to January 5, 1927, thus enabling Old Country visitors to enjoy at a minimum expense the maximum of travel comfort. Canadian Pacific ticket agents can give full information and arrange every detail.

BABY'S OWN TABLETS
ARE OF GREAT VALUE

To All Mothers Having Young Children in the Home

No other medicine is of such aid to mothers of young children as is Baby's Own Tablets. The Tablets are the very best medicine a mother can give her little ones during the dreaded teething time because they regulate the stomach and bowels and thus drive out constipation and indigestion; prevent colic and diarrhoea and break up colds and simple fevers.

Concerning Baby's Own Tablets, Mrs. John A. Patterson, Scotch Village, N.S., says:—"I have six children, and all the medicine they ever get is Baby's Own Tablets. I would use nothing else for them and can strongly recommend the Tablets to all others."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Milk And Sugar Combined For Cooking

Have you ever noticed how, in making sweetened drinks, a professional always uses a boiled sugar syrup? It is to get that wonderful flavor and consistency that marks a perfect combination of the liquid and the sugar. Many a good cook has vastly improved her recipes by using Eagle Brand Condensed Milk for this very reason. The milk and sugar are thoroughly combined (almost pre-cooked, you might say) so that results are obtainable that could not be expected if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage. Aside from saving sugar—and the trouble of mixing—there is the certainty of a finer flavor to the dish. The condensed milk combines quickly and easily with all other ingredients—blends them closer together—and gives the recipe a smoother texture. Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

Minard's Liniment for Neuralgia.

Homeward Bound
For CHRISTMAS

Old hearts will beat more quickly; old eyes will shine with happiness when YOU go home. And what a joy it will be for you, too, visiting the scenes of childhood days and meeting friends of other years!

Make arrangements now to go home this Christmas on a liner of the Cunard or Anchor-Donaldson Canadian Service. The voyage will be an unforgettable pleasure. The ship's comfortable appointments and the courteous, intelligent interest taken by every member of the staff in your well-being make your journey a real joy.

Much better for every milk purpose. Never fails—always ready. Pure and rich—

Use it wherever the recipe calls for milk.

The term sirloin (Sir-Loin), was originated by Henry VIII. of England, who was so pleased at a dinner in which that cut formed the main item that he conferred the honor of knighthood on the steak.

Some men never do anything on time except quit work.

Write Murine Co., Chicago, for Eye Care Book

CANADA SHOULD DEVELOP OWN FUEL RESOURCES

Ottawa.—Recommendations for a national fuel policy, to supply Canada's coal consumption from her own mines, was made by Hon. G. S. Harrington, minister of public works and mines, in Nova Scotia, before the special committee of the house investigating the Dominion's anthracite supply.

Chief among the recommendations made by Mr. Harrington were:

(1) Governmental assistance to secure the erection of coking plants within Canada at points serving large centres of population;

(2) The granting of a subvention on maritime coal water borne to Montreal when carried by rail west of Montreal;

(3) Protection to maritime coal from unfair competition by American producers, and (4) Cancellation of the bonding privilege for American coal for bunker supplies in Canada.

"It appears to me essential that in Canada we make up our mind at the commencement whether or not we can adopt something in the nature of a national fuel policy, the aim and object of which would be to produce within Canada the coal that we consume in the Dominion," he declared. Such a policy should, stated Mr. Harrington, be adopted.

He pointed out that thirty million tons of coal were consumed annually in Canada. Yet, seventeen million tons of this coal were imported.

A. J. Creighton and H. H. McWilliams, Owen Sound, recommended a rail and lake haul from the head of the lakes of Alberta coal in preference to an all-rail haul in box cars. They suggested the briquetting of screen coal at the mines, and the establishment of coking plants at well populated centres.

Denial From Washington

United States Not Involved In Any Way With League Controversy

Washington.—Diplomatic officials made swift and emphatic denial that they had been involved even indirectly in the league controversy which resulted recently in Brazil's withdrawal as a league member.

E. V. Morgan, United States ambassador at Rio de Janeiro, has cabled a categorical denial of a story that he had congratulated President Bernardes upon Brazil's resignation from the league.

Amendment Thrown Out

Change in Immigration Act Is Rejected By Senate

Ottawa.—The government bill to amend the Immigration Act was thrown out by the senate. The bill was designed to remove the provisions inserted in the act after the Winnipeg strike which authorized summary search of the premises of people suspected of association with seditious movements and deportation without trial of any but Canadians found guilty under these clauses.

Hard Hit By Floods

Vienna.—Fourteen communes in Austrian Burgenland have been inundated by cloudbursts. Bridges were washed away and houses were burned after having been struck by lightning. Several communes in Upper Austria were devastated. Owing to the heavy rainfall the Danube in Vienna has risen nine feet.

Auto Road Across Rockies

Lake Louise, Alta.—Eleven years after it had been surveyed and mapped out by the Dominion parks department, the first automobile highway across the Great Divide from Lake Louise to Field, British Columbia, running parallel to the Canadian Pacific Railway, was formally opened on June 16th.

Series of Robberies

Vancouver.—A series of burglaries, which resulted in goods to the value of approximately \$1,500 being stolen, most of the "jobs" apparently being the work of experienced gangs of thieves, was reported here from various towns on the lower mainland of British Columbia.

W. N. U. 1634

Urge Equal Cattle Duty

Canadian Tariff Should Be On Same Basis As U. S.

Ottawa.—Equalization of the Canadian customs duty on cattle with that of the United States was recommended by a sub-committee of the whole House of Commons agricultural committee.

The sub-committee, appointed to consider the cattle question, reported that a "recommendation that the Canadian customs tariff against United States should be placed on the same specific basis as the United States tariff on Canadian cattle, with the provision that if the United States tariff be removed or reduced, the Canadian tariff would thereupon be removed or reduced to the same extent."

The sub-committee also recommended that Canada's minister to Washington be appointed at once and that the Canadian Government should enter into negotiations with the United States looking to the entry into the United States of Canadian cattle on a more favorable basis than at present.

Britishers Buy U. S. Fruit

Imports of Apples Larger Than From Other Countries

London.—Englishmen eat a larger proportion of apples from the United States than from any other country, according to figures published by the Imperial Economic Committee. It estimates the average Englishman in 1925 ate about 100 apples. Of these 38 came from the United States, 25 from the United Kingdom, 19 from Canada, and eight from Australia and New Zealand.

But of 70 oranges each Englishman ate that year only one came from the United States.

The committee estimates almost one-third of the annual payment on the debt to the United States of £11,000,000 was paid in 1924 for American fruit.

Jazz Proves Fatal

Eminent London Musician Succumbs to Blast From Jazz Band

New York.—Professor Nicolo Covello, 79 years old, one of the best known musical composers of Europe, head of the Barham School of Music in London, dropped dead in the Bowery at Coney Island, following a nervous paroxysm, his relatives say, to a sudden blast from a jazz band in one of the concessions.

Professor Covello, born in Italy, but a resident in England for more than 50 years, arrived in New York two weeks ago enroute to visit his son, Howard Covello, a rancher in Saskatchewan. He was to have left for Canada this week.

Looking Into High School System

Rochester, N.Y.—W. Gibson, of the British Columbia department of education, was here gathering information on the operation of the junior high school system in which Rochester was a pioneer with a view, it is said, to establishing a similar system in Vancouver.

BALDWIN'S PLAN IS OPPOSED BY LABOR PARTY

London.—The parliamentary Labor party voted to resist strenuously the proposals outlined by Premier Baldwin in the House of Commons regarding re-organization of the coal industry.

The miners, at a special meeting presided over by former premier Ramsay MacDonald, voted unanimously for a resolution declaring that the government's declaration of policy on the mining crisis regarding the hours of wages was a violation of the recommendations made in the report of the royal commission.

The resolution also stated that the government's policy was inadequate to meet the problems of the industry. It was a surrender to the demands of the mine owners and was calculated to prolong and embitter the industrial struggle in the coal fields.

Mr. MacDonald already had expressed the opinion that Premier Baldwin's suggestion for a partial suspension of the seven-hour day would serve to make the miners more solid in their strike.

Searching For Art Collection

Valuable Paintings and Jewels Have Disappeared in San Francisco

San Francisco.—The Russian department of the Bank of Italy has begun a search for a collection of paintings, bronzes and precious stones valued at \$500,000, supposed to have been stored in a bank vault three years ago. The collection was assembled in the far east by the late Ivan Leonidovich Kalmykov, court artist to the Czar of Russia.

The search was instigated at the request of Mrs. Kautiska L. Meyer, of Shanghai, sister of Kalmykov, one of numerous claimants to the property. The bank is unable to find any record of when the collection was stored, although "Kalmykov" exhibited it here three years ago.

Kalmykov died here in 1925 and is supposed to have left a will providing for the return of the collection to Russia when the United States recognized that government.

Corn Borer Plays Havoc

Windsor, Ont.—That the European corn borer had reduced the price of land in certain parts of Essex County at least 50 per cent. was the statement made before a meeting of the Essex County Council by Judge Miller, provincial agricultural agent. The end of the Essex corn belt was predicted by Mr. Miller, who declared the county was faced with the necessity of finding equally remunerative crops.

Edmonton Woman Elected

Ottawa.—Mrs. J. J. Duggan, Edmonton, was elected first vice-president at the closing session of the Catholic Women's League of Canada. Mrs. B. C. McCann, of London, Ont., was re-elected president.

Wembley Buildings Sold

Go To Private Purchaser After Auction Sale Abandoned

London.—The "white elephant" structures, as the colossal buildings including the stadium of the Wembley Exhibition, were many times described, have finally been disposed of, it is authoritatively stated.

A public sale was held at the Wembley grounds June 15 and the buildings, together with 130 acres of ground, placed on the auction block, but after a few minutes of bidding during which the highest price offered was £315,000 (approximately \$1,535,000) the sale was abandoned.

The auctioneer remarked he had received a better offer privately, and it was declared the buildings and grounds had been sold to the maker of the private offer.

The name of the purchaser and the price paid were not divulged.

Ban On Conscription

This Subject Occupies Attention At Geneva Meet

Geneva.—The problem of conscription and the possibility of France and other nations with big armies contributing to the cause of disarmament by restricting conscriptions loomed up as a big factor at the disarmament meeting. France, which submitted a memorandum to the conference of experts, insisted that the question involved is essentially political, and therefore must be handled by the full commission or an eventual conference, but did not declare herself opposed to its consideration.

Interest has been created by the fact that France at least deems the limitation of trained reserves as a theoretical possibility.

Send Out British Gunboats

In Effort to End Banditry in Chinese Province

Canton.—British gunboats have been dispatched to Nanning, Kwangsi province, to put an end to the banditry and robbery which resulted recently in the kidnapping and murder of J. M. Phillips, British manager of the Asiatic Petroleum Company.

Phillips' body was found in the West River at Nanning, June 8, several days after he had been carried away by bandits who demanded ransom. Soldiers were sent to rescue him and the bandits, hard pressed, are believed to have killed Phillips and thrown his body into the river.

China Leaving League Is Report

Geneva.—The newspaper Genevois says China, following the example of Brazil, will resign from the League of Nations this autumn because Chinese interests are not sufficiently protected by the league. There is no confirmation of the report.

Bulgarian Peasant Shot

Sofia, Bulgaria.—Two Greek border guards are reported to have shot a Bulgarian peasant at the frontier. Bulgarian officers have demanded a meeting with Greek officers for the purpose of an investigation.

GRAIN ACT BILL TO BE DEALT WITH BY COMMITTEE

Ottawa.—The act to amend the Canada Grain Act, which was introduced in the House of Commons by Milton Campbell, Progressive, Mackenzie, Sask., was referred to the committee on banking and commerce by the senate. The bill, which has passed all stages in the house, proposes to give the farmer authority to designate the terminal elevators to which he desires his grain to be shipped, and also, in another clause, makes Moose Jaw, Sask., an order point for grain shipments.

The second reading of the act to amend the Grain Act was moved in the senate by Hon. W. B. Willoughby. Mr. Willoughby traced the history of the co-operative elevator movement in Saskatchewan and the development of the wheat pool. He claimed that the grain commission had intended to give the right to the farmer to designate the terminal elevator to which he wishes his wheat shipped. Farmers complained that in many private elevators there was mixing of grain from which he received no benefit, nor did he participate in the profits arising from overages. Senator Willoughby said that this bill had been criticized on the ground it would confiscate private interests in terminal elevators. He claimed there was no such object or intent in the bill.

Senator W. B. Ross, Conservative leader in the senate, thought a measure of this importance should be sent to the banking and commerce committee, where evidence, both from the wheat pool and the elevator interests, could be given. Senator Willoughby urged that a special committee be selected, and was supported in this by Senator Dandurand. Sir George Foster felt that to send this bill to a special committee would be to arouse suspicion and distrust, and urged that the banking and commerce committee be selected. This was done on the motion of Senator Ross.

Ontario Elections Predicted

Premier Ferguson Makes Announcement At Orillia

Orillia, Ont.—Announcement that the Ontario Government would go to the polls in about 12 months on "any policy which might be deemed the best for the people," and that there would be "no listening to extremist views" in the handling of the temperance question, was made by Premier G. Howard Ferguson, in his address to a monster Conservative picnic here. His administration, he said, would persist in efforts to bring Alberta and maritime coal to this province.

Premier Ferguson expressed the opinion that there was no reason why the Dominion should import 15,000,000 tons of coal annually when there are such rich fuel resources in this country.

Bags Enormous Wolf

Winnipeg.—George Kemp, who spent the winter at Norway House, brought to Winnipeg recently the skin of what is believed to have been the largest grey wolf ever shot on the American continent. The wolf, which was shot by C. Herman, a trapper, measured seven feet six inches from tip to tail. The wolf was shot 200 miles northeast of Norway House.

Rescue Crew Of British Ship

Tokio.—All members of the crew of the British freighter City of Naples were rescued by the Japanese cruiser Kasuga and destroyer Urakaze, the Kasuga reported by wireless to the navy department. Seventy-three men were taken off the freighter, which went aground about 150 miles south of Tokio.

Yacht Owner Protests

New York.—Shots fired at the private yacht Aloha, owned by Arthur Curtis James, New York capitalist, while enroute from New York to Newport, presumably by a rum boat chaser, have been made the subject of a protest to Washington, while alleged promiscuous firing by a coastguard patrol boat at Miami, Fla., is under investigation.

A British expedition in Northern Fayum has found baskets 7,000 years old belonging to the Libyan Flint Age.

Splendid British Family Comes to Canada

Here are Mr. and Mrs. Davies and their eight children, from Machen, Monmouthshire, England, bound for Edmonton, Alberta, for farm work. The cost of the passage of the whole family is less than one ordinary fare, as they came out under the 3,000 family settlement scheme. The Canadian Pacific liner Montcalm left Liverpool recently with 2,000 emigrants on board bound for Canada under the 3,000 family plan, many of them paying only £3 for their passage.

UNLIMITED POSSIBILITIES

FOR PROFIT MAKING

IN THIS NEW CANADIAN INDUSTRY

First Purely
Canadian
Breakfast
Food

A New Industry operating under a Dominion Charter, combining the operation of an Elevator, Grain, Cereal and Feed Business with the Manufacture and Marketing of an Entirely New Balanced Breakfast Food—an industry with an almost unlimited market and vast possibilities for profit making—the Public is invited to co-operate and share in this Great Investment Opportunity.

VITOMEN CEREAL LIMITED

is the name of this new company organized to profit by the huge quantities of Canadian grain now passing through the Port of Vancouver. The Company has purchased from the Manitoba Grain Company, Limited, the site at 285 First Avenue East, Vancouver, B.C., and the Manitoba Grain Company is building for the Vitomen Cereal Limited, as a first unit of their factory, a building 40 feet by 140 feet of solid mill construction. This building will be included in the sale and transfer of properties from the Manitoba Grain Co., Ltd. to Vitomen Cereal Limited. In addition to this Vitomen Cereal Limited will build an elevator and warehouse at a later date, plans of which are already out, for the purpose of continuing and extending the original business of the Manitoba Grain Company, Limited. The Company owns and controls the right to manufacture and sell in Canada, and to export to all parts of the British Empire and elsewhere, the new cereal food product known as "Vitomen Shreds." This Company also holds the right to use the copyrighted name "Vitomen" on all other food products to be manufactured by it.

The control of Vitomen Cereal Limited is not in the hands of a few people, as 350,000 of our 500,000 shares capitalization will be offered to the Canadian public at the par value of \$1.00 per share. All shares are common, each carrying a vote in the affairs and management of the Company and participating equally in the earnings.

FIRST PURELY CANADIAN BREAKFAST FOOD

The manufacture of ready-to-serve breakfast foods has never before been attempted in British Columbia, nor in Eastern Canada, except by subsidiaries of the great American companies, which have built up huge fortunes for their founders and shareholders. Such a concern as Vitomen Cereal Limited will become a substantial factor in Canada's industrial life. It draws its materials from the wheat fields and gardens of the prairies. It will also provide through the payroll of its manufacturing plant a large and constant contribution to the business of the West.

VITOMEN SHREDS

The New Balanced Breakfast Food

will be one of the chief products of Vitomen Cereal Limited. Vitomen Shreds being a highly nutritious breakfast food that provides well balanced diet of all the necessary elements for bodily nourishment. It is a well-established scientific fact that no one meat, grain, vegetable or fruit can supply a sufficient amount of the vital food elements required daily to build up nerves, brain, glands and tissues. The ordinary breakfast food cannot do it. This is where Vitomen Shreds steps in with its scientifically balanced content that forms a complete food by itself. Vitomen Shreds consist of finest whole wheat, celery, lettuce, spinach, alfalfa leaf flower, yeast, butterfat, organic salts and honey. Besides being so highly nourishing, Vitomen Shreds are delightfully appetizing and palatable. In fact they are the ideal breakfast food, the only one now on the market which forms a complete balanced diet without the addition of other ingredients. Unquestionably such a product only needs judicious and persistent advertising and distribution to give it first place on the breakfast tables of all Canada and the entire British Empire.

Unlimited Potential Market

Vancouver has been selected for the location of the first factory for the manufacture of Vitomen Shreds. Grain is there in abundance. Other components are available close at hand, reducing transportation costs on raw materials to a minimum. It is intended to develop the Canadian Market first, extending it thereafter to Great Britain and the entire British Empire. The plant in Vancouver now being built and equipped at a cost of some \$50,000 will care for an initial production of 1,000 cases of Vitomen daily, each case containing twenty-four standard size packages.

Managed by the Right Men

Vitomen Cereal Limited will be controlled and directed by Western business men, experienced and successful in the grain trade and the allied manufacture of cereal foods. This is important—it means intelligent, efficient and economical management and substantial profits to the shareholders. The president of the Company, Mr. J. W. Langs, is a Vancouver manufacturer of long standing and experience. Mr. G. M. Geiger, vice-president, formerly of Seattle, has been a cereal manufacturer for many years past. The secretary-treasurer, Mr. E. T. Matchett, of New Westminster, is experienced in the grain and retail trade. The services of these men are invaluable to the Company. Their combined experience should surely bring success to such an undertaking.

HUGE PROFITS!

are being made by other similar companies, paying enormous dividends to their Shareholders

The profits made by the American breakfast food manufacturers are almost unbelievable! Huge fortunes have been amassed and are still being made, as the following figures demonstrate:

\$500 in Kellogg Corn Flake Company pays 100% daily
\$500 in Postum Cereal Co. has returned \$124,535
\$500 in Shredded Wheat Co. is worth \$50,000
\$500 in Cream of Wheat Co. is worth \$140,000

The following extract from "Saturday Night," of March 20, 1926, also makes interesting reading:

"SHREDDED WHEAT COMPANY'S INCOME:

The Shredded Wheat Company of Canada reported at its annual meeting in Niagara Falls on February 9th, a gross income for the year of \$1,827,974! Dividends amounting to \$1,000,000 will be divided among the shareholders. After the present quarter of the financial year is closed every shareholder will receive four shares for his one present share. The Company wrote off \$500,000 for goodwill. Although the profits for the year were greater than last year, the dividends were lower because of the fact that the new factory was built and equipped out of income."

INVESTIGATE FULLY-- Consider the possibilities of profit-making in this undertaking for YOU. Mail the Coupon to-day for complete information as to this co-operative and profit-sharing organization.

Are Sensitive To Music

Martial Airs Have An Especial Attraction For Horses

Horses are particularly sensitive to music, especially martial airs. In 1892 a certain regiment was making a military test march. When the music started a young horse, ridden by a captain, hastened forward and placed itself in spite of its rider, behind the last rank of the musicians. Then it followed peacefully, giving obvious signs of pleasure. When the music ceased the captain was able to resume his place at the head of his company. But when the band struck up again the horse galloped ahead, and once more placed itself behind the musicians.

Fine for catarrh when melted in a spoon or snuffed up the nose and vapors inhaled.

Head and Chest Colds Relieved In a New Way

A Salve which Releases Medicated Vapors when Applied Over Throat and Chest.

Inhaled as a vapor and, at the same time absorbed through the skin like a liniment, Vicks VapoRub reaches immediately inflamed, congested air passages. This is the modern direct treatment for all cold troubles that is proving so popular in Canada and the States where over 17 million jars are now used yearly. Splendid for sore throat, tonsillitis, bronchitis, croup, head and chest colds, catarrh, asthma or hay fever. Just rub Vicks over throat and chest and inhale the medicated vapors. It quickly loosens up a cold.

VICKS VAPORUB
OVER 21 MILLION JARS USED YEARLY

she brought me in here. Before I realized it I got to telling her how much I do love you, and why I can't have you. That was all. She told me, of course, that I was a fool. She is one who would think so."

"And so am I John," Joanna told him, quickly.

Kenilworth opened the door. When he saw that John was there, still there, he would have gone away and closed the door behind him. Joanna called him back.

"Mr. Wilmore is just leaving," she explained, eyeing John, coolly. "And I don't want to go out and dance just yet. I want you to stay in here and talk to me."

It would have been an awkward moment if Roddy had been one ever to be at a loss to meet any situation. His wisdom seldom failed. He chaffed her and said good night to the younger man with an ease that cleared the atmosphere. When John went out Joanna did not get up from the couch. She held out her hand to him and when he took it she wrapped her fingers about his and held them for a moment. There were no words between them.

Roddy went over and gently closed the door, which John had left opened. When he stood over the girl her head had dropped onto her arm. She had drawn her knees under her. As Roddy took note of her he concluded that just then she was not thinking of herself, or of anything about herself. Instinctively he sensed the slow swaying of a scale beam, weighted at either end with two precious bits of magic. And he knew that one end of the scale was slowly dropping. He wondered which end would be the heaviest.

Without a warning rattle the lump figure on the couch straightened and rose. Roddy knew how the scale had turned. He was startled by the change in Joanna. Her poise was new, and almost regal. There was something haughty and something else defiant and dangerous in her.

"I wonder," she asked him, stirring him with a look from between her lids that he had not caught before. "If you would think me very silly if I should ask you to do a very silly thing."

His answer was the obvious one. And it was obvious, also, that he should go a little closer to her. The message in her eyes made it so.

"I want you to kiss me," she said.

HAIR CAME OUT IN COMBFULS

Pimples on Scalp Itched Badly. Cuticura Heals.

"After having the flu my hair fell out so that I had to have it bobbed. I also had some pimples on my scalp and it itched badly. My hair was lifeless and dry, and when I combed it, it came out in combfuls."

"I sent for a free sample of Cuticura Soap and Ointment. It helped me so I purchased more, and after using two cakes of Cuticura Soap, together with the Cuticura Ointment, I was completely healed." (Signed) Mrs. Geo. H. Elliott, West St., R. R. 4, Orillia, Ont.

Cuticura Soap, Ointment and Talcum are all you need for everyday toilet and nursery purposes. Sample Each Free by Mail. Address: Canadian Depot: "Hudson's Bay Co., Ltd., 100, King St. W., Toronto. Price: Soap 25c, Ointment 25c and Talcum 25c. Cuticura Shaving Stick 25c.

Strange, Romantic Love Adventures of the Flapper you know

Joanna
by H. L. GATES
Copyright 1923 by H. L. GATES
Published by arrangement with First National Pictures, Inc.

CHAPTER XVIII.—Continued

She saw the stubbornness that she always hated, settle deeper in his eyes. "No," he returned. "It can't be worked out that way. Jo, I'd never live with you in a house you'd paid for, even with money given you for a reason that I hope will turn out to be all right. You see, I too, have plans. You know them, even if you never cared much about listening to them. I've got to make my way. The career I want is one that can't be bought. You can't give it to me like you would a birthday present. Different, you see, from yours."

She looked at him from widened eyes. She wondered at her own calm. She was not hurt, as she had been that night at Mrs. Adams' when John repulsed her. He was not doing that sort of thing again. Now he was quietly, stubbornly taking himself out of her life, or rather thrusting her out of his.

A wild impulse to run up stairs, wrap herself in a cloak and run out into the street with him, thrilled her for a moment and then lapsed into the deadly calm that puzzled her.

"But John," she said. "I love you. I have always loved you. Why must you make such a fuss about the money? It won't change me, not so much as it has changed you?" He interrupted her:

"That's just it. It won't change you. It has only brought you out of yourself, and revealed you. This sort of thing won't get you any place in the end. It is not the background for a girl, no matter how good she is, and I believe, Jo, as I always have, that you're good. You will stay good just as long as you can. I shall always

want you, but I just can't have you. Can I?"

His last words were a pleading for his justification. It would have been better, perhaps, if he had not spoken them. They reminded Joanna that he was one who would not, could not, understand her, or, one like her. Still she wasn't hurt. She suffered, because her heart was turning over. She longed for him, wanted to yield to him as he would have had her yield to his fears for her and to his ideas that she should be some other kind of girl, but she realized that it would all be useless. She would never be content with all enchantments taken out of the world that had suddenly become so lavish with her.

"But John," she said. "I love you. I have always loved you."

"Then you won't be coming back, you won't accept things as they are and come back to me?" she asked.

"If you still want me, when I have made my own way, and have money of my own, I will be wanting you," he said, slowly. She probed his words and understood what he really meant. "You mean," she said, "that you will want me enough, even, to take me no matter what I shall have become, by then? Isn't that it?" He wouldn't answer her. She continued:

"Was it because you think that I should be drab, and a kill joy, and go into a shell and hide except when some prudish chaperone is satisfied that I have enough clothes outside of me and enough false shyness inside of me to make it safe for her to take me out for a walk in a church yard, that you spent more than an hour shut away in here with Yvonne? She doesn't walk about with her eyes on the ground and her mind on the purities of the lily. Didn't you suffer—all alone with her?"

"We were talking of you," he replied, shortly.

"Yes," she retorted, her eyes narrowed a bit. "there's a man who coaxed me into the winter garden just a little while ago, and spent the whole time talking of his wife." She knew that she was being utterly foolish and childish, and irrelevant. But, still, she watched John curiously. For some reason he thought it necessary to explain.

When I told her I was going and wanted to say goodnight, as I should,

He drew her up to him instantly. His lips had almost brushed hers when she suddenly pressed him back—again that trick with her hands. "I want to tell you something, first?" she exclaimed. "It isn't you Roddy, that I want to kiss me—anyone would do just now. There's something on my lips, something that was put there a little while ago, I want taken off—it needs a kiss to do it. Because you happen to be here I am asking you. You see I must be fair with you—since I am doing the asking."

"One explains a kiss afterwards, never before," he murmured and caught her hands and held them. She yielded her lips completely. She felt that she was being wrapped in a burst of flame. She closed her eyes so that she would not see what was in his, but she gave herself to the caress without stint. When he released her she said:

"There! You mustn't spoil it by demanding another. I want to go out to the party, now, and dance. And I am going to flirt outrageously with Teddy Dorminster. He has been begging me to discover how sentimental he can be all evening. But I still want you to do something else for me. I want you to make sure that Yvonne knows you kissed me, and that I allowed it. You don't need to say I asked you but you may say that I didn't take my lips away."

Within half an hour Joanna was hidden away, in the safest corner of the winter garden, with young Teddy. She had promised him only fifteen minutes. She granted him but a few more, despite his pleadings that one couldn't crowd an eternity into such a short space of time. She insisted that he find Brandon and bring him to her. "He has not been nice to me, tonight," she explained. "And I want to be nice to." She laughed at that rhetorical mix-up and sent him away.

Roddy Kenilworth, when he had turned her over to Dorminster, went back into the morning room. When he had made himself a drink, out of the bottles in the cabinet, he settled back in a chair and fell to studying the ceiling. When Yvonne looked in he explained that his brain had become twisted around a conundrum and that he couldn't take an interest in anything or anybody outside until he'd straightened it out.

Cold In Head Clogged Nostrils

Ringed Ears and Buzzing Head Noises Quickly and Pleasantly Relieved By Simple Wormwood Treatment

No more hawking, spitting or blowing, dry ticklings, dull headaches or buzzing head noises. Use Geero Wormwood Balm in your nostrils, twice a day and you may bid goodbye to catarrh and troublesome head colds.

The pleasant, cooling and soothing fragrance of this old-time Wormwood treatment promptly penetrates all through the air passages of the nose and throat—your clogged nostrils quickly open up—the "ringing" noises stop—you breathe through your nose freely as nature intended and your dull old head feels clear and clean!

Put your faith in Geero Wormwood Balm and you won't need to stay stuffed up with a nasty cold or catarrh. At all good druggists—at little cost.

A New Hobby For Women

Remarkable Interest Is Now Being Taken In Basketry

Most people will have noted the remarkable growth of interest in basketry of late years. At last women have a hobby offered them far more interesting to the average person than sewing, which does not affect the eyes, and develops a decided creative ability. Practically all of the Federal and provincial institutes in Canada are promoting this work, as are also numbers of the schools, with the result that many people are finding that they can combine pleasure with usefulness in filling in their spare time at a pleasant hobby and at the same time furnish all the small articles of furniture which are so necessary to the comfortable home.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Men who are always attempting to kill two birds with one stone never bag much game.

Reginald Frank Stone

—Rathliffe Studio

St. Catharines, Ont.—"During my first expectant period I was in very poor health, was very nervous, suffered from morning sickness, had backache and abdominal pains. I was as miserable as could be. Thru a friend I learned of Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine; it relieved me of the morning sickness, pains and distress thru my back and sides and I grew well and strong. Was able to do my own work the remainder of the time. I experienced very little suffering and had a fine healthy baby, who has never had a day's sickness except slight colds. I was very glad to know of a medicine so valuable as the 'Prescription' proved to be."—Mrs. Reginald Stone, 63 Haynes Ave. All dealers.

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec. "I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—Dame WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use.

Local and General.

A BOARD OF TRADE WANTED.

Judging by the activity displayed by the Boards of Trade in neighboring towns one is inclined to believe that these organizations must have a certain value or they could not exist. Indeed, one might ask himself the question, why some towns are peculiarly and particularly active in this respect whilst others are content to drift?

That a Board of Trade has a real value one must admit, especially so when it can gather within its ranks men of initiative and resource, men who realize the value of sacrifice and whose loyalty and pride in their town is undoubted.

Every town has its own problems to solve, and their solution is as much of importance to one resident as another. It follows then, that each must, or should, share in the responsibility. That is a privilege, as well as a duty pertaining to one's citizenship. Is it not time that Didsbury fell into line and also had its Board of Trade?

The Town Council has its own civic problems to deal with and outside of the duties directly affecting their office, the mayor and council cannot be expected to go further. It is here where the Board of Trade could step in and by co-operation with the chosen few of the council, take up and deal with matters wherein every resident could have a part.

ARMISTICE DAY.

Thursday, November 11th, is

Armistice Day, and the suggestion has been made that a service to suitably commemorate the occasion be held here in Didsbury on the evening of that day. It might possibly be a combined service of the various denominations, and of such a character that all could join in.

To reverence the devotion of those who fell, and to keep alive the spirit of sacrifice, the loyalty to and love of country of those who took part, is something worth attempting, and if by commemoration we can only in part convey to the younger generation the same high ideals no effort would be too great.

The W.C.T.U. will meet at the home of Mrs. H. Reiber on Wednesday, November 10th, at 3 o'clock sharp. We are hoping that all the members and friends of our organization will be present. A paper on "Christian Citizenship" will be given by Mrs. C. Powers. This is a subject that should be of real interest to us all.

The meeting of the Y.W.C.T.U. is postponed for one week, because of Thanksgiving. Hence it will be held on November 15th, at the home of Miss E. Chambers. All are cordially invited.

The Women's Institute will meet at the home of Mrs. Geo. Smith's, Friday, November 12th, at 2.30. A interesting programme is being arranged by Mrs. J. E. Huget on Legislation. All members and friends are requested to attend.

Apart from admitting that negotiations were under way for securing the control of a terminal elevator at Vancouver, officials of the Alberta Wheat Pool stated on Tuesday that they were not as yet prepared to make any official statement on the matter.

S. G. Watt left Calgary early on Wednesday morning for Vancouver where his father's condition, following a major operation, is causing serious concern. Bert Cressman and Tommy Johnson drove Sid to Calgary at midnight to catch the early train.

A. R. Kendrick and Noble Cole were in Banff last week for the purpose of installing a milking machine for 19 cows. Several delays, however, connected with arrangements for the power attachments postponed the installation for a few days.

Edward Scheidt of Portland, Ore., who has been visiting his son Walter for the past couple of weeks, returned home last Thursday. Father and son motored to Fort Saskatchewan last week and spent a few days visiting friends there.

C. O. A. McCaig, an old-timer of this district, and who for some time has been living with his son-in-law, E. Liesemer, died on Tuesday, November 2nd, aged seventy-two years and five months. The funeral will take place to-day (Thursday) from the residence at one o'clock.

A meeting of the Red Cross Society (Didsbury branch) was held at the home of Mrs. Kendrick on Tuesday evening to arrange for the annual drive. Last year the canvassing was very successful and the local branch was enabled to send a very satisfactory amount to Calgary. This year, however, it is felt that the object of the Red Cross being so much better known the results will be greater, and the canvassers are looking forward to increasing the total gained in the last drive.

J. A. McGhee resumed his position at the C.P.R. depot this week following his vacation, the last few days of which he spent visiting friends at the coast.

Dave Irwin drove down to Calgary on Tuesday to bring back his son, who has been in the hospital there for some time. The latter has improved greatly and it is hoped shortly he will fully recover.

Fisher and Edwards will have a car on track to receive live poultry on Wednesday and Thursday, November 10th and 11th. Highest cash prices will be paid.

W. J. Hillyard has just received a new type of harness, several features of which will be extremely interesting to our farmer readers. It is not possible to go into details, but perhaps it may be sufficient to say that the harness is so constructed as to make it almost unbreakable. An examination would be worth while.

Monday next being Thanksgiving Day, all places of business in Didsbury will be closed.

At the Opera House, Didsbury, on Saturday Nov. 6th, the picture will be "Rin-tin-tin in Below the Line." Patrons please take notice that in future the show on Wednesdaynight will commence at 8 o'clock instead of 8.30, Saturday, 7.30 p.m.

Harvest Thanksgiving service will be held at St. Cyprian's church on Sunday afternoon next at three o'clock. Will friends kindly leave decorations in the vestibule of the church as early as possible on Saturday.

Something Different in Harness.

The 'Wearmore'

A new harness just received. Something out of the ordinary. Absolutely guaranteed. New features throughout.

"Wearmore" dimensions --

Lutheran Conference to Meet at Westcott.

The pastors of the southern Alberta Conference of the Missouri Lutheran church will meet for a three-day conference at the St. Paul's Lutheran church of Westcott. A very elaborate program has been arranged including a study of the Epistle of Paul to Titus, a series of sermon outlines for the advent season and several essays of a doctrine character. On Tuesday evening a pastoral service will be held beginning at 7.30. Rev. R. Massner of Champion, Alta. will deliver the pastoral sermon and Rev. W. Eifert of Trochu, Alta. the confessional address. Members of the congregation will be hosts to the visiting clergy.

FORD MAKES THRILLING RACE.

London, Ontario, Sept. 18.—The proverbial thrill that comes once in a lifetime came to hundreds of Ford owners in the grandstand at the Western Fair to-day when they saw a Ford romp away from Whippet and Chevrolet competitors in the special five mile race on the Queen's Park track. The Ford finished nearly six hundred yards ahead of the other contestants, making the five mile grind in 7.27. The race was a special feature of the fair program, resulting from a challenge issued by the Whippet representatives to all owners of light cars.

The spectators saw a thrilling race despite the fact that the Ford led the whole way. For the first four miles the contest was exceptionally keen between the Whippet and the Ford, but the Chevrolet was easily lapped. The Whippet made good time on the corners, but on the straight the Ford zoomed like a racing car.

PAYING UP.

By WALT MASON

When I have paid my monthly bills I feel some pleasant grateful thrills, emotions safe and sane; glad smiles among my whiskers play, and to myself I softly say: "I have not lived in vain." Downtown I journey in my coach; I see the tailor, Jinks, approach, and do not fear his glance; for I have paid him every great I owed him for my picnic coat, and my high-water pants. I meet the tinsmith face to face; he bows to me with princely grace, he's glad to get my trade; he overhauled my handsome bus, and didn't have to fret and fuss o'er payment long delayed. And all the merchant-princes smile as I proceed in pompous style, along Commercial street; I've paid the grocer for his cheese, the farmer for his humble bees, the butcher for his meat. Oh, friends, it is a goodly thing to walk as proudly as a king, although you have no crown; to prance along with stately tread, and know you do not owe a red to any skate in town. So when it's time for paying bills a peace serene my bosom fills, my spirit sings and hums; and I can't understand the gent who will not pony up a cent until the bailiff comes.

MOUNTAIN VIEW BIBLE COLLEGE OPENED.

The opening of the above college took place on Tuesday, the event being very noticeable for large attendances both afternoon and evening. Addresses peculiar to the occasion were given by various speakers, and a note of deep thankfulness was noted throughout in having such a fine building erected at Didsbury. Many of those in attendance came from a long distance. The program for the day was as follows:—

Afternoon Program—
College Chapel—2.00 p.m.
Opening song;
Invocation;
Address, President A. Traub;
Address, Mayor H. W. Chambers;
Quartet;
Address, Rev. E. Reimer;
Address, Rev. H. E. Roppel;

Duet;
Address, Dr. Clark;
Closing song.

Evening Program
College Chapel—7.30 p.m.
Song Service;
Prayer;
Address, Principal W. Reist;
Duet;
Missionary Talk, Maggie Finlay;
Song;
Closing Message, Mrs. M. Finlay.

ST. CYPRIAN'S. (Church of England)

Priest-in-Charge, Rev. H. Clay,
box 157, Olds.

First Sunday in month—Afternoon at 3.0 p.m.

Third Sunday in month—Morning at 11 a.m.

School is held every Sunday.

NEW CANADIAN INDUSTRY.

Another new industry, to employ at least 100 men will be in operation in Vancouver in about three months time. Besides manufacturing a product that is used in almost every home, this company will sell many side lines that will add to the business of the new firm which, according to the standing and ability of the officials, is assured of abundant success from the start. We refer to the Vitomen Cereals Ltd. This company proposes to manu-

facture several lines of a new balanced breakfast food and other table cereals that have as their basis the vitamins recently found to be necessary to the building up of health and the prevention of disease. This is the only purely Canadian company to manufacture this line of products.

It presents a unique opportunity for a safe conservative investment to the average man or woman who cannot afford to risk their savings in a doubtful, risky speculation. Further information may be obtained from the Calgary office of the Company at 314 Maclean Block.

Votes And Their Value

Analysis of the vote cast in the last Dominion general election discloses the same anomalies and contradictions revealed in elections generally for many years, and which, while causing much dissatisfaction and open criticism have, as yet, failed to result in steps being taken to remedy an admittedly weak condition in our present form of democratic government and in the election of representatives in Parliament. Various schemes have been suggested as a means of overcoming this weakness but none have proved wholly acceptable to a majority of the people.

The situation complained of is that all votes have not equal value; that, as a matter of actual fact, the vote of one man, or woman, is in many instances just as effective in electing a representative as the votes of two other men and women; that Canada today does not enjoy representation based on population; that the majority does not rule.

In support of these contentions it is pointed out that in the recent election the Conservatives polled 1,476,747 votes and elected 91 members to the House of Commons, while Liberals and Liberal-Progressives combined polled 1,454,933, or 21,814 votes less, but elected 132 members. In other words, Liberal and Liberal-Progressive votes had greater power than Conservative votes. Why?

The reason is found in the fact that Conservative strength lies chiefly in the large manufacturing cities and centres of population like Toronto, Hamilton, London, Halifax, Vancouver, Montreal and Winnipeg. In these cities Conservatives are usually elected by huge majorities. On the other hand, in smaller urban and rural ridings the candidates of other parties have a fighting chance and are frequently elected but by much smaller majorities.

Furthermore, it has always been an accepted principle that the unit of population entitled to elect a member should be larger for cities than for rural districts. All political parties have agreed as to this, it being recognized that a City Member can keep more closely in touch with his constituents than can a member representing a rural riding, and that residents in a city constituency have means of making their views and desires known, and of enforcing their opinions, which is not possible in a rural constituency with a scattered population. There is so much force in this that no party has ever seriously challenged the fairness of requiring a larger population in city constituencies.

The existing plan of single member constituencies with larger populations in city ridings works to the advantage of the Conservatives in the cities where Liberals and Labor are denied the representation to which their numbers entitle them, but, on the other hand, it works to the advantage of Liberals and other groups in the rural ridings.

To right the grievances in both sets of constituencies the advocates of Proportional Representation urge the abolition of the single member constituencies and the creation of larger constituencies electing four or five members each and the use of the single transferable ballot whereby every considerable group of public opinion would be able to obtain representation in exact proportion to its voting strength.

Objection is taken to this plan on the ground that it would result in too many groups in Parliament and the consequent inability of any one party or group to form a strong government. The force of this objection is, however, weakened by the fact that the present system has in no wise prevented such groups, and the deadlock which existed in the last two Parliaments was brought about, not under Proportional Representation, but under the existing system. Even in the newly elected Parliament there are no less than seven distinct groups as follows: Liberals, 119 members; Conservatives, 91; Progressives, 6; Liberal-Progressives, 13; United Farmers of Alberta, 11; Labor, 3, and Independents 2.

Another objection, and a much stronger one, is that while Proportional Representation might be workable in centres of population, it is hardly applicable to settled rural Canada where constituencies to elect four or five members would have to be unduly large.

Hon. Hugh Guthrie, the newly chosen temporary leader of the Conservative party, announces that while he does not favor Proportional Representation, something should be done to remove the inequalities in representation which now exist. He therefore advocates making the unit of population for all constituencies, urban and rural, the same. This would assist to remove the Conservative grievance in rural ridings, but would continue all the handicaps under which Liberals, Labor and others now suffer in the large city constituencies. Further, unless the membership of the House of Commons was largely increased it would mean greatly reducing the representation of all rural and the smaller urban centres while adding enormously to the large cities and manufacturing centres, thus practically giving the Conservative party a permanent position of power.

During the last century giant forward strides have been made in the extension of the franchise and in simplifying and improving methods of elections, but with it all we have rigidly adhered to an obsolete constituency method of dividing the country and which is responsible for the well founded complaints now heard. There is room for reform in this vitally important matter in order that real democracy may prevail.

When Meat Sells Itself

Appleford Sani Wraps speak to your customers each day, reminding them of your name, your phone number and quality of your products.

Besides the Sani Wraps with a special printed message, Appleford supplies wraps with stock printing. The latter states the value of the waxed sheet and shows customers you are anxious to have meat reach them in perfect condition. Let us send you prices.

Process Perfected That Makes All Blood Suitable For Transfusions

The time is not far away when blood suitable for use in transfusions can be obtained in bottles at a drug store, Dr. J. L. Yates, Milwaukee, Wis., predicted at the convention of the Interstate Post Graduate Medical Assembly in Cleveland.

Often when a minute's time balances the life of a patient needing a blood transfusion a "donor" with right kind of blood cannot be found. Dr. Yates pointed out. Scientists in Prague, Bohemia, Dr. Yates said, have perfect centrifugal washing process of blood serums which is so profound that it will render suitable even the blood of oxen and sheep, which, if transfused in natural state, would bring almost instant death.

It was deemed practicable that this process will make it possible to buy at a drug store blood bottled up without "characteristics" and ready to match for transfusion.

RHEUMATIC PAIN AND THIN BLOOD

Liniments of No Avail — The Trouble Must Be Treated Through the Blood

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears. There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these is Mr. Robt. A. Smith, Mersey Point, N.S., who says:—"Some years ago I was attacked with rheumatism, which grew so bad that I could not walk and had to go to bed under the doctor's care. It is needless to say that I underwent a great deal of suffering. The doctor's medicine did not seem to reach the trouble, so when I was advised to try Dr. Williams' Pink Pills I did so, and after taking them for some weeks I was able to get out of bed. I continued using the pills and was soon able to work, and I have not been troubled with rheumatism since. In other respects also I derived a great deal of benefit from these pills and I think them a wonderful remedy."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A cow's hide produces thirty-five pounds of leather; a horse's only eighteen pounds.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the outdoor laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicine boxes and be amongst those taken on a journey.

A live turtle on whose shell was carved the date 1815 was found recently in Connecticut.

Minard's Liniment for Colds.

Greater London has 2,300 miles of streets and their upkeep costs about \$15,000,000 a year.

An Oil that is Prized Everywhere.—Dr. Thomas' Electric Oil was put up on the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Can Create Artificial Fogs

German Chemists Are Said To Have Discovered Method

A method of causing sudden artificial fogs on a large scale has been discovered by German chemists. It is said that the introduction of this new "weapon" may have far-reaching effects on naval and land warfare, causing the enemy to be nonplussed and ships or troops to be withdrawn under cover of mist when an attack is launched. It is reported further that experiments made by the German army are equally promising, the fog created being so dense that it was impossible to see more than two yards ahead.

Egypt may include Canada among those countries in which she will be without representation, according to a statement made recently by Emile Sharteni, acting as unofficial ambassador to Canada who arrived in Canada on the Canadian Pacific liner "Minnedosa." Mr. Sharteni is trying to interest Egypt in Canadian flour and timbers, and in return expects the Dominion to reciprocate by purchasing cotton, dried fruits, etc., direct from Egypt instead of through the middlemen in London or New York.

Walking about on a two-foot wide platform, 200, 300 and even 500 feet up the outer surface of huge chimneys is all in a day's work to Henry Held, expert chimney builder and climber, who was employed recently by the Canadian Pacific Railway to overhaul a 200-foot chimney in the station yards at the Windsor Street Depot in Montreal. It took eight days for Held and his assistant, Richard Boucher, of Three Rivers, to move the platform, secured by a heavy cable, up the side of the chimney, in order to begin work at the top.

Lord Clarendon, Under-Secretary of State for Dominion Affairs in the British Government, sailed for England from Quebec on the Canadian Pacific liner "Empress of France," September 29th, bringing to a close an extended tour of the Dominion investigating the conditions under which the 3,000-family immigrant scheme is being carried out in Canada. His Lordship, who is chairman of the Overseas Settlement Board under whose auspices this scheme is being conducted, made the statement before his departure that he was greatly satisfied with the conditions amongst Britishers who have settled in Canada under this scheme. He personally visited over 180 families.

The Hebridean emigrants who are leaving their lone shellings and misty islands for a new life in Canada have, curiously enough, hitherto been ignored by the novelist, although the romance of this migration, extending over a hundred years provides a wonderful field for fiction. The extent of this field has now been realized, however, in the new novel "Eyes of a Gypsy," by the Canadian writer John Murray Gibbon, who is the well-known author of "Drums Afar", etc., and Dean of Publicity of the Canadian Pacific Railway.

Action should be taken by the authorities in the Province of Quebec to shorten the open season for hunting deer and moose, according to Ozark Ripley, well known writer on animal and wild life and prominent hunter and angler. Mr. Ripley also believes that the deer season is too early as in September the deer are still in their red coats, and their numbers are only conserved through their ability to hide amongst the leaves of the underbrush which have not yet fallen. He believes that a scarcity of this game will result from the lengthy season.

The Earl of Clarendon, Under Secretary of State for Dominion Affairs in the British Government, who has been touring the Dominion investigating the conditions under which the 3,000-family scheme from Great Britain is working out, declared, in an interview at the Canadian Pacific Windsor Street Station at Montreal recently, that one of the greatest things upon which the success of the scheme depended was the loyalty and cheerfulness of the mothers of families brought out to Canada to be located on farms. His Lordship paid a special tribute to the type of women brought out under this scheme whom he had met during his personal visits among immigrant families.

Save the Children from Diphtheria.

(Issued by the Department of Public Health)

Dr. Hugh Cumming, Surgeon General of the United States Public Health Service, challenges all parents of the country to save their children from unnecessary diphtheria.

"Although diphtheria attacks persons of all ages," he says, "it is pre-eminently a disease of children, especially of children from one to six years of age. The disease is also much more apt to be fatal in young children, so that prevention is especially important in the pre-school period. About 57 per cent. of the deaths from diphtheria in the U.S. Registration Area are in children under 5, and 85 per cent. in children under 10 years of age."

With the advent of November we are in one of the most dangerous seasons of the year, for during this month and December and January diphtheria takes its heaviest toll of health and life.

"In general," according to Dr. Cumming, "diphtheria is more prevalent and more fatal in the Northern than in the Southern States; and the death rate is higher in cities than in the country. The well-to-do seem to suffer as much as do the children of the poor."

The study of the figures of Dr. Cummings shows since the year 1920 a real decline in this scourge of childhood. With 120,000 cases, however, and 10,500 deaths throughout the United States in 1924, there is need for everyone to see that his children are protected against diphtheria.

As long as diphtheria continues at all it is not only causing a great deal of suffering to a great many children, and heartbreak in thousands of fam-

ilies where the children die, but it is always in danger of assuming the proportions of a monstrous epidemic. We do not need to be reminded of the influenza which swept the country during 1918-1919, nor do we want to see any disease that can readily be wiped out sweep in similar fashion through the ranks of childhood. Diphtheria of the type we now know seems to have begun somewhere between the years of 1850 and 1860 and after that time it spread over the entire civilized world.

"In the United States," says Dr. Cumming, summing up the history of the disease and thereby pointing out the menace we are averting, "following the invasion of the pandemic, about 1855, diphtheria continued to be highly prevalent and very fatal until about 1900. Its course differed in different parts of the country; but, in general, the mortality increased from about 1855 to 1885 or 1890, when the death rate reached as high as 200 per 100,000 or over in some of the large cities. Since about 1885 to 1890, the death rate has steadily declined, due in part to a decreased number of cases, but more to a decreased case-fatality, which since 1896, may be attributed in large part to the general use of antitoxin in treatment."

A cure is a miracle, but prevention of a disease is as beautiful as a law of nature or of God. When every father and mother realizes that there need not be any diphtheria, diphtheria will cease to exist. The means are perfected to-day which will make your children safe from infection. If one of them should by any chance get diphtheria, the means are perfected for saving his life.

As Dr. Cumming phrases it, "There

are three lines of attack for the control of diphtheria, namely:

"1. Protection against exposure to virulent diphtheria germs.

"2. Immunization by toxoid of susceptible persons, so that if exposed to the disease they will not contract it.

"3. Curative treatment, chiefly by the administration of antitoxin.

"All three lines of attack must be followed for the most effective prevention."

Your own private physician or your local or provincial board of health will give you any information and assistance you may need in your effort to protect your own children and the children of your community.

Where local boards of health or other organizations are forming clinics for the administration of toxoid, it is urged that they also offer vaccination against smallpox. The two treatments can be advantageously combined.

There is no risk in combining the two prophylactics, such as procedure has become routine with officials of the Provincial Board.

D.D.D.

This greatest of skin remedies will remove those skin afflictions that have made your life a burden. That intolerable itching, burning and discomfort will disappear under the magic of this remedy. It has healed many cases pronounced hopeless and will reach your case. The first \$1.00 bottle relieves you or your money back. Try D. D. D. today, too.

H. W. CHAMBERS

As a progressive Dairyman desiring to secure maximum profits from my milk herd, I realize the necessity of adhering to an organized schedule of care, feeding and handling.

<p>AVERAGE MILK PRODUCTION PER COW IN DIFFERENT COUNTRIES</p> <p>THOUSAND POUNDS PER COW</p> <p>NETHERLANDS SWITZERLAND UNITED KINGDOM DENMARK GERMANY CANADA UNITED STATES NORWAY SWEDEN HUNGARY AUSTRALIA JAPAN ITALY CHINA</p> <p>Taking inventory, I have decided that pure milk is better than purified milk and that I want not more cows, but more and better milk from each cow.</p>	<p>Any cow in my herd suspected of being a boarder or otherwise lacking in necessary qualifications shall undergo a fair, but thorough test. What I spend on my herd must come back to me as a profit.</p>
<p>My first step should be the selection of a true type herd—a selection which should always command great care and good judgment.</p>	<p>During the hot months, whenever possible, I shall supply my herd with a cool, clean, outside resting place, where they may chew their cud in peace and ruminate on the blessings of being a provider rather than a parasite.</p>
<p>Proper selection of dams also will bring its own rewards in more milk, better milk and better animals.</p>	<p>A dirty condition like that pictured here shall never prevail in my herd. Rather than scrape, curry and brush endlessly, I shall clip and quickly clean thoroughly by wiping with a damp cloth.</p>
<p>The comfort of the animal is important. Thorough cleaning aided by periodical clipping about flanks, udders and underlines during stable months and all over the body when turning out in the spring shall be part of my program. Clean animal, clean milk with low bacteria count.</p>	<p>A clean, neat, clean, plentiful bedding, water at the stallion and no milking within an hour of feeding are all part of the program which I shall enforce rigidly.</p>
<p>The growth in the number of cow testing associations convinces me that membership in one is a good thing. I pledge my association full support and co-operation.</p>	<p>The dairy or creamery that buys my milk must value quality and sanitation as much as I do. They must carry on from the point beyond which I have no control.</p>
<p>Proper feeding is essential. Therefore I shall always provide a carefully balanced ration to my herd, as well as a plentiful supply of pure, clean water.</p>	<p>Then when my milk is bottled I shall know I am repaid for my efforts. I shall get more milk and more money for my milk and the gospel of clean and better milk shall spread throughout the land.</p>

Harvest Home and Thanksgiving will be observed next Sunday, November 7th, with suitable activities in sermon and song, etc., both in the morning and evening service. This will include the observance of the Armistice. There will also be some harvest decorations to suit the occasion as a stimulus for thanksgiving.

The W.M.S. missionary drama on India last Friday evening was well attended with an equally good response for mission resulting in an offering of about \$25.00.

Died—Mr. Geo. A. McCaig passed away last Tuesday morning, November 2nd, at the farm home of Mr. and Mrs. Ed. Liesemer, eleven miles east of Didsbury where the deceased had been residing with his daughter during his illness. Twenty-five years ago he came from Orangeville, Ontario and settled as a pioneer on a homestead farm in the Carstairs district. He died in his 72nd year and having been a worshipper at Jutland with the Evangelical people and later also with the Baptists. The funeral services were conducted at the residence by Revs. Gauerke, Evangelical and J. Reimer, Baptist. The interment took place at Didsbury cemetery.

KNOX AND WESTCOTT UNITED CHURCH

Sunday, Nov. 7th, will be observed as Armistice Sunday. The minister is taking for his text: "All things work together for good to them that love God." Rom. 8:28.

Superficially interpreted the text is not true. Though you love God you may have bad health, and you may have money losses and you may be slandered by man. You will certainly have to take your share of the common disasters which afflict mankind. They can it be said, then, that all things work together for good. The minister suggested last Sunday

Grapes.

We bit--Will you

Phone 65

night that each one think over this text and try to bring a solution. It is a fitting Armistice Day subject. This week Mr. Hayes is attending the Conference at Edmonton. A call has been issued to all ministers of the United Church to attend.

LONE PINE HALL, JUTLAND

Sunday Service at 3 p.m. As it is Armistice Sunday Nov. 7th, a full attendance is expected. Mr. Hayes is to conduct the service and is taking for his subject "Providence and Chance."

BAPTIST CHURCH NOTES

Thanksgiving services will be held at Zella school and Westcott Baptist church next Sunday, November 7th.

The attention of the Westcott people is called to the fact that beginning next Sunday, the service will begin at 7.30 instead of at 8.00 as formerly.

Sunday school at Elkton at 3.30. Come and bring your friends.

LUTHER FILM COMING

The arrangement committee of the Westcott Lutheran church has been able to arrange a booking of the Luther and the Concordia Seminary Dedication films sooner than was anticipated. Both films will be shown here

on Wednesday evening, Nov. 10—the birthday of the great Reformer. Mr. Sharpe, the local theatre proprietor, has courteously granted the use of the Didsbury Opera House for the showing of the films. Only one showing will be given, beginning at 8 o'clock. Up till November 10th tickets may be purchased through any member of the Lutheran church.

The Luther film has been shown in more than 800 churches of various denominations of Protestant Christianity in the score which accompanies the film has been written by Mr. Rechlin, prominent organist of St. Matthew's Lutheran church, New York City, and includes various hymns composed by Dr. Martin Luther, the Reformer himself. Among them his noted battle hymn, "A mighty fortress is our God."

The committee in charge considers itself extremely fortunate in securing a booking of this classic film for Didsbury and vicinity.

Almost a million bushels of grain were loaded by the Canadian Pacific at country points in Alberta on Monday. This constitutes a record in grain loading so far this season. The bulk of the grain was destined to the head of the lakes.
